

CSV@VET CLA(Leader Training Activity), one of the activities in WP2 of our project and one of the important milestones of the project flow, was hosted by our Portuguese partner Istec University on 8-12 October 2023. All partners attended to this training. At the end of this 3-day training,

We learned about the 3 pillars of “Create Shared Value” at our LTA event and exchanged views on individual country-related aspects of the environment, society and the economy. Many topics were discussed in order to coordinate our strategies and goals for CSV. In order to live up to our project motto “Create Shared Value”, many CSR questions must be further researched and answered in order to further develop shared value together. This allows us to bring our CSV ideas and experiences to our partners and companies to convince them of the advantages of CSV. Now CSV@VET Ambassadors from each partner organization are ready to spread the idea.

## presentations
